New Tork:—The organic phosphate discovered by Prof. Pelouz, the famous French scientist, concerning which so many astounding reports have been published, has again won high recognition in medical circles. At an annual meeting of the New Hampshire Medical Society the report on two rather striking cases showed one patient to have gained 23 pounds and another 27 pounds in weight after a few weeks use of this aubstance. Both ciaimed they have not felt so well and strong for years. These cUnical tests, with many other similar ones, have led authorities to the definite conclusion that this organic phosphate when taken into the human system is actually converted into healthy body tissue.

Moreover the real benefits derived from its use are not confined to the mere increase in weight of thin people. Being an efficient and harmless nerve food which supplies the essential lifegiving phosphorus directly to the brain and nervous system, it commends itself to all men and women who are irritable, restless, nervous; those who tire easily or lack vim and vigor; men and

Sworn Statement of the Composition of the Formula of Nuxated Iron

How it helps to increase strength and build up delicate nervons, run-down folks.

The Board of Directors have authorized the broadest publication of the sworn statement of the composition of the for-mula of Nuxated Iron, so that the public may examine it for themselves and judge as to its merits. It is conservatively esti-mated that this remarkable formula is now being used by over three million people an-Among those who have used and who have used and strongly endorsed it are many physicians who have been connected with the beat hospitals and medical societies. Hon, Leslie M. Shaw, Former Presidential Cabinet Official-Secretary of the Treasury, Vice-Presidential Nominee Chas. A. Towne, former members of Congress; distinguished U. S. Army, Generals, (Bettired), Judge Athreasure. Army Generals (Retired), Judge Atkinson of the United States Court of Claims at the United States Court of Claims at Washington, and former Health Commis-sioner Kerr of Chicago.

Newspapers everywhere are invited to copy this statement for the benefit of their readers. It is suggested that physicians make a record of it and keep it in their offices so that they may intelligently answer questions of patients concerning it. Everybody is advised to cut it out and keep it. A copy of the actual sworn statement will be sent to any one who desires such.

Each dose of two tablets of Nuxated Iron ontains one and one-half grains of organic iron in the form of iron peptonate, of a special specific standard which in our opinion possesses superior qualities to any other known form of iron. By using other makes of Iron Peptonate we could have put the same quantity of actual iron in the tab-lets at less than one-fourth the cost to us, and by using metallic iron we could have accomplished the same thing at less than one-twelfth the cost, but by so doing we must have most certainly impaired their therapeutic efficacy. Glycerophosphates used in Nuxated Iron is one of the most expensive tonic ingredients known. It is especially recommended to build up the nerve force and thereby increases brain power, as glycerophosphates are said to contain phosphorus in that particular state so similar to that in which it is found in the nerve and brain cells of man.

As will be seen from the above, two important ingredients of Nuxated Iron (from Peptonate and Glycerophosphates) are very expensive products as compared with most
